The Technological Solution

# Revolutionary Solutions

Trelleborg is again revolutionizing the industrial tire world with the introduction of our new resilient tire solution. These revolutionary tires are precision-made using advanced manufacturing techniques combined with premier compounds developed and mixed exclusively by Trelleborg.

Soft Shoe® HP

We've redesigned the traditional Soft Shoe® tread pattern on these tires to have:

- deeper lugs for a longer life with an improved ride quality
- flat profile to optimize its stability.
- a re-designed base/cap interface that offers an improved ride and makes this tire the truest rolling resilient in the industry

With their innovative design, increased performance, optimized stability and groundbreaking consistency these tires are the resilient tires of the 21st century - a truly solid pneumatic tire with a cushion ride.

Currently available in four core sizes\*, don't let the revolution pass you by.

Size	profile	rim	Soft Shoe® MonoMatic	Soft Shoe® HP	Tire OD	Tire Width	Tread Width	Tread Depth	Load Capacity 6 mph	Tire Weight
6.00 x 9	New LUG	4.00	66-229-06	66-229-00	20.50	5.82	5.1	1.00	4,230	55.3
6.50 x 10	New LUG	5.00	66-230-06	66-230-00	22.45	6.70	6.0	1.00	5,810	76.4
7.00 x 12	New LUG	5.00	66-231-06	66-231-00	25.45	6.70	6.0	1.25	9,000	99.0
8.15 x 15 (28 x 9 x 15)	New LUG	7.00	66-211-06	66-239-00	27.40	9.45	8.3	0.70	8,360	147.0

\*available in MM, HP and HP Non-Marking compounds.
